Personal Profile

I am a junior frontend developer based in the UK with hands-on experience in building modern and responsive web applications.

I have two years of practical experience in web development. I began with an apprenticeship focusing on HTML, CSS, and JavaScript, building a strong foundation in frontend development. I then progressed to React, where I developed real-world projects including a restaurant ordering system and a barber booking website.

Alongside my development journey, I completed my HNC in Computing while working night shifts as a delivery driver, demonstrating strong discipline, time management, and commitment.

I am passionate about creating clean, user-friendly interfaces and continuously improving my skills. I am now seeking an opportunity to begin my career as a frontend developer.

Technical Skills

- Frontend: HTML, CSS, JavaScript, React
- Programming: JavaScript, basic Python
- Tools: Git, GitHub, Netlify, VS Code
- Other: Responsive design, UI/UX fundamentals

Key Skills

- Problem-solving and logical thinking
- Teamwork and leadership (Army Cadets experience)
- Strong communication and customer service skills
